AMRUTVAHINI COLLEGE OF ENGINEERING, SANGAMNER

(An Autonomous Institute)

S.Y. B. Tech (Electronics and Computer Engineering)

CCE II– Git and GitHub Repository, Semester – III, Oct. 2026

Data Structures and Algorithms [R25-EC-PCC-202]

Unit – IV Stacks and Queue (Total: 08 Marks)

Activity: Create and maintain a GitHub repository for the implementation of programs related to Stacks and Queues. Use Git for version control and maintain the source code with appropriate documentation. Submit the GitHub repository link as evidence of the completed activity.
At least following implementations should be demonstrated.

1. Implementation of stack using array
2. Implementation of queue using array
3. Implementation of stack using linked list
4. Implementation of queue using linked list

Note- Additionally students can maintain GitHub repository containing all practical experiments, Case study (Music player list), and course project implementation.
